

Online Safety Expert Coming to Wolftrap

Tuesday, January 10th @ 7:00pm

Wolftrap Library

Nancy Gifford with the Family Online Safety Institute will be joining the PTA to offer advice to parents as our children dive into the murky waters of the Internet. Informed parents will better understand cyber bullying and other online dangers. We will learn how to protect and enable our children to make good decisions as they and/or their friends begin to text and post online comments. The presentation will include cyber bullying, creating an online reputation, digital ethics, filters and monitoring technology, and general online safety.
